Part Number Illustrations and Descriptions

F00E900348

SMT 300 Smoke Solution — This patented solution is the only automaker-approved smoke-producing solution. The solution's chemistry contains a special dye that deposits at the exact location of a leak. Each (12 oz.) bottle will perform approximately 300 full cycle tests.

F00E900349

SMT 300 Cap Plug Set — Useful when sealing an intake manifold system in order to contain the smoke in the system for proper leak testing such as mass airflow sensor ducting.

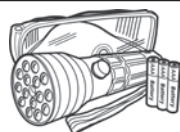

F00E900350

SMT 300 Exhaust Cone — For introducing smoke into the exhaust system or into any opening that accommodates the cone's size, such as the induction system.

F00E900351

SMT 300 Smoke Diffuser — Designed to locate leaks around doors, windows sunroofs and trunk compartment.

F00E900352

SMT 300 Light and Glasses — Turn it on and it delivers a white light, for easier smoke location. Click it again and it delivers an ultraviolet (UV) light that highlights the fluorescent dye deposited at the exact location of a leak. Click it a third time to activate the laser pointer. Kit includes light, amber glasses and batteries.

F00E900353

SMT 300 EVAP Port Adapter — Attaches to the vehicle's service port to allow pressurizing EVAP system.

F00E900354

SMT 300 Schrader Valve Tool — Used for removing and re-installing the Factory EVAP port Schrader valve during smoke test procedure.

F00E900355

SMT 300 Inert Gas Pack — Empty 20oz. CO₂ bottle and regulator to use in lieu of shop air. Provides the safest way to test EVAP system leakage. Fully filled bottle provides capacity for 25 full cycle tests. Refer to the Operator Manual for full details.

F00E900361

SMT 300 Filter Kit — Replacement element for the SMT 300 internal filter system. Protects the SMT 300 from workshop air contaminants. Yearly replacement is recommended.

F00E900362

SMT 300 Universal Neck Adapter — Allows direct connect of the SMT 300 smoke output hose to most fuel tank filler necks. Fuel tank and peripheral component testing is thus made easier.

F00E900363

SMT 300 BMW-Mini Neck Adapter — Allows direct & specific connection of the SMT 300 smoke output hose to BMW and Mini fuel tank filler necks. Fuel tank and peripheral component testing is thus made easier.

F00E900364

SMT 300 Accessories Case — Plastic, click-style attaché case to store items included with the SMT 300 kit.

F00E900365

SMT 300 Preset 100psi Regulator — For use with larger nitrogen bottles in the shop. Connects to the large bottle standard outlet fitting. Use with cylinder hose P/N F00E900366.

F00E900366

SMT 300 Cylinder Hose — Connects the SMT 300 inlet to the optional 100psi Nitrogen Regulator P/N F00E900365. 25 foot.
